EDUCATION

Kristianstad University <i>Bachelor in Computer Science, Software Engineer</i>	Aug. 2024 – June 2027 Kristianstad, SE
University of Gothenburg <i>Frontiers of Digital Transformation Research</i>	May. 2025 – Sep 2025 Gothenburg, SE
Linköping University <i>Elements of AI</i>	Jun. 2021 – Aug 2021 Linköping, SE

PROJECTS

SideQuest <i>Skill-based freelance marketplace</i>	2026 Malmö, SE
- Connects students with people who need quick, reliable freelance help. Built with a team of four using React, Vite, Express, Node.js, Prisma, and MariaDB. - Supports role-based experiences for talent, clients, and admins, a searchable marketplace, and a two-way request inbox where clients propose scope and price and talent can accept or decline. side-quest-theta-neon.vercel.app	
SipLog <i>Full-stack wine tasting and cellar app</i>	2026 Malmö, SE
- Built with React, Express, and MongoDB. Users log structured tasting notes (appearance, nose, palate, structure, rating) with photos, and browse and favorite other users' tastings in a community feed. - Includes following and direct messaging between users, plus an admin dashboard for site stats and user management. sip-log-app.vercel.app	
Pantry Panic <i>AI-powered meal planning app</i>	2026 Malmö, SE
- Built solo with Next.js, TypeScript, Expo/React Native, Supabase, and the Claude API. Generates AI recipes for a single meal or an entire week based on mood or ingredients on hand. - Auto-builds a combined shopping list, walks the user through each recipe step by step, and protects each user's private data with row-level security. pantrypanic.vercel.app
